 **imagePRESS®**
1135/1125/1110

Canon, a leader in imaging technology, is ushering in a new era in black-and-white printing with the imagePRESS® 1135/1125/1110 digital presses. Continuing with the tradition of the imagePRESS brand, Canon has augmented this line to meet the evolving needs of the monochrome printing market. These revolutionary black-and-white digital print systems exceed expectations, providing the excellent image **quality, productivity,** and **versatility** that only Canon can deliver.

Image Quality

The quality of the imagePRESS 1135/1125/1110 digital presses has made a leap forward. Image quality is a criterion that Canon has dramatically improved upon. The imagePRESS 1135/1125/1110 digital presses have the ability to produce beautiful halftones, rich deep blacks, and hold very thin lines as well as perfectly defined text. In addition, these presses render very fine highlight details as well as shadow details, without plugging and filling. You'll be amazed at the technological advances that Canon has made, all in 1200 x 1200 dpi resolution.

Specifications

Productivity

Productivity is on everyone's mind. A digital press must deliver more than just outstanding image quality; it must have sufficient paper capacity to not only print on a continuous basis, but also without interruption and, of course, with high reliability. The Canon imagePRESS 1135/1125/1110 digital presses offer flexible paper handling to manage diverse applications common to production environments. With an astounding paper capacity of 14,000 sheets, the imagePRESS 1135/1125/1110 digital presses will provide hours of uninterrupted operation.

Versatility

Canon designed the imagePRESS 1135/1125/1110 digital presses with the needs of its customers in mind. There's no "one-size-fits-all" approach when it comes to printing. For this reason, these black-and-white digital presses consist of a modular design with plenty of input and finishing options. And because customization is critical for printing environments, the imagePRESS 1135/1125/1110 digital presses can be configured to meet your needs.

As your business grows, Canon can provide you with the right solutions to meet your changing needs. With the migration in the printing industry from analog to digital, the Canon imagePRESS 1135/1125/1110 digital presses can help make that transition a smooth one. They're an ideal fit for the new customer-driven business model of customization.

In today's print manufacturing environment, customers not only have printing requirements, they also have archival needs. The optional single-pass Duplex Automatic Document Feeder (DADF) and Color Image Reader allow you to scan hard-copy documents to create a digital archive. Another benefit is that these accessories scan in color. Lastly, the DADF is extremely productive since it has the ability to scan both sides of the page at the same time.

Canon is committed to ensuring that the right solution is provided for current and future workflows. The imagePRESS 1135/1125/1110 digital presses have an open architecture that's flexible for your existing workflow. Whether you're employing a Canon device or third-party solution, the Canon imagePRESS 1135/1125/1110 digital presses can be incorporated seamlessly into your existing workflow. You can count on Canon to deliver image quality, media handling, and reliability you need—and expect—from a leader in imaging technology.

MARKING ENGINE

Resolution:	1200 x 1200 dpi
Halftones:	256-Level Grayscale
Print Speed	
Simplex:	Up to 135/125/110 ppm (LTR) Up to 77/74/68 ppm (11" x 17")
Duplex:	Up to 67/62/55 ipm (LTR) Up to 38/37/34 ipm (11" x 17")
Media Capacity	
Standard:	2,000 Sheets (20 lb. Bond) x 1 Tray (Any supported media; includes New Advanced Feeding Technology, MultiFeed Detection)
Maximum:	14,000 Sheets (20 lb. Bond) with 3 POD Decks
Acceptable Paper Weight:	14 lb. Bond to 110 lb. Cover (52gsm - 300gsm) (All Trays)
Marking Engine Dimensions (H x W x D):	54-1/8" x 54-5/8" x 31-7/8" (1370mm x 1385mm x 808mm)
Power Requirements:	208V/30A and 208V/15A

INPUT ACCESSORIES

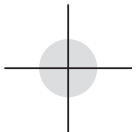

- Color Image Reader (Scanning Resolution: 600 x 600 dpi)
- Duplex Automatic Document Feeder (Single-pass double-sided color scanning capable)
- POD Deck (Combine up to 3)
- Multi-Insertion Unit

FINISHING ACCESSORIES

- Professional Puncher
- High-Capacity Stacker (Combine up to 2)
- Perfect Binder
- Finisher
- Saddle Finisher
- Puncher Unit: 2/3-Hole Punch
- Paper Folding Unit
- Booklet Trimmer
- Two-Knife Booklet Trimmer

PRINT SERVERS

- EFI® MicroPress® for Canon
- imagePRESS Server J100/J200
- imagePRESS Printer Kit
